Altrient® C

The essential skin rejuvenator

SUPERCHARGED LIPOSOMAL VITAMIN C

“
Transform your skin from
within by increasing your
body's own collagen
production

ALTRIENT C IS PROVEN TO VASTLY INCREASE SKIN ELASTICITY AND REVERSE SIGNS OF PREMATURE AGEING NOT JUST ON YOUR FACE BUT ALL OVER YOUR BODY

Altrient C liposomal vitamin C is the only food supplement clinically proven to increase skin firmness and elasticity by an astonishing 61.4%, other skin care products simply can't compare!

The human body is a sophisticated self-healing regenerative organism, if you give it what it needs, it will do the work by itself.

Our body's collagen production begins to slow down as we age. You can thank this process for giving us wrinkles and sagging skin. Vitamin C plays an essential role in collagen production. We are one of the only mammals on the planet that doesn't have the ability to produce our own vitamin C, the only way we can get it into our bodies is through diet or supplementation. Getting enough vitamin C into our cells is tricky, as vitamin C isn't easily processed, absorbed or stored by our body.

“

This nutrient boosts collagen production, cleverly protects skin cells from the harmful effects of UV light and assists with skin cell repair and renewal.

— Susie Perry DeBice, Health Writer, Author and Nutritionist

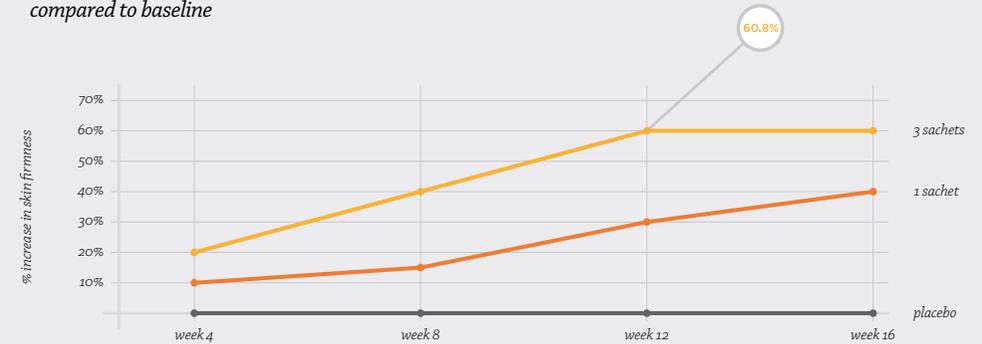

Altrient C has the answer; a revolutionary new patented vitamin delivery process called Liposomal Encapsulation Technology (LET)

which maximises absorption, all the way to our cells, where great skin begins. As our cells are nourished with Altrient C our body's own vitamin C-dependant collagen production is regenerated and we naturally begin to produce more collagen giving us visibly plumper, firmer and smoother skin.

An independent double-blind, placebo-controlled study carried out by Princeton Consumer Research Centre, proved a staggering 61.4% increase in skin firmness and elasticity and a reduction in the appearance of fine lines and wrinkles on both the face and body. Those given placebo treatment showed no change at all. These incredible results were achieved by taking just 3 sachets of Altrient C a day over a 16 week period. At week 8 elasticity had increased by 40%, by week 12 it had reached 60.8% and by week 16 it had risen to 61.4%. Of the 41 women that took part ranging from 31 to 61 years old, all said that they would add Altrient C to their daily skincare routine.

Altrient C is easy to take; simply tear open the sachet, empty the gel into a small amount of water and shoot it down.

Percentage change of skin viscoelasticity compared to baseline

We can't make collagen without vitamin C. Feed your body what it needs and your skin will rejuvenate from within. Naturally.

Percentage change of fine lines and wrinkles compared to baseline
